

"... Her magistrates judge for a bribe, her priests teach for pay, & her prophets foretell for sake of gain ... **preachers preach lies in My name** ... they preach to you a false perception, a pagan lie, & the invention of their own hearts!"

Micah 3:11 & Jeremiah 14:4.

## Beware The Myth Makers

Many free thinking people, after reading the first chapter of the entire Bible record, have retired from their brief inquiry confirmed in their mind that this book is indeed a collection of impossible myths & unscientific contradictions. Such conclusions appear justified in light of the numerous & often contradictory interpretations of the scripture record promoted by religious institutions & societies within our land.

Are the records of the ancient scribes mere myths created within superstitious minds or have modern religious myth-makers effectively obscured the clarity & purpose with which our inspired ancestors endowed the sacred writings?

The author will attempt to answer these & many other important questions as we move through the many forgotten chapters of secular history & sacred scripture in our quest for the Dreaming of our own White Tribe.

We begin our story with a review of the Genesis account of creation & the origin of race. Our chronicle then recounts the forgotten explorations & migrations of our ancestors as they trekked westward toward the setting sun, driven ever onward by the providential hand of our covenant keeping God to the far ends of the earth, planting as they went the seeds of a civilisation & culture that today stands at the cross-road of its very own survival!

Folk-lore, myth, legend or historical reality?  
You be the judge!

## Chapter One ... Genesis : The Book of Beginnings

### 5,000 - 4,500 million years ago

The widely accepted scientific opinion is that the universe began about 4,600 million years ago. The sun & the planets in our solar system were formed approximately 4,500 million years ago from a huge cloud of gaseous matter. As the cloud of gaseous matter contracted it collapsed toward its centre & began to spin. The collection of hydrogen nuclei at the centre were squeezed, reaching high density & undergoing fusion. Products of this process were helium nuclei & enormous amounts of energy; this being given off in the form of heat & light. The sun formed whilst solid masses collecting around heavier grains of dust became planets.<sup>1</sup>

"By Periods God created that which produced the Solar Systems; then that which produced the Earth."<sup>2</sup>

### 4,500-3,000 million years ago

The atmospheres of the terrestrial planets having issued forth from molten interiors through volcanic fissures & craters have, during this era, progressed from their original composition.

The primitive atmosphere of the Earth

was hydrogen rich, containing hydrogen compounds such as water, ammonia, methane & hydrogen cyanide as well as other gases such as carbon monoxide & carbon dioxide.

Water condensed & formed the oceans about 3,600 million years ago, & most of the carbon dioxide in the Earth's atmosphere was then combined with water to form carbonate rocks.

Through this combination the Earth avoided having a massive carbon dioxide atmosphere like that of Venus.<sup>3</sup>

"... the Earth was unorganised & empty; & darkness covered its convulsed surface ... God then said, "Let there be light"; & light came. This was the close of the first age. God also said, "let there be an expanse in the midst of the waters" ... Thus God made the expanse, & divided the waters which were under the expanse from the waters that were above; & that was done. And God named the expanse "sky." This was the close of the second age."<sup>4</sup>

The inspired writer, at this point of the creation account records the preparation of the Earth to receive life. Perpetual darkness begins to give way to life sustaining sunlight as the darkened & gaseous skies begin to clear. A new "day" had dawned upon the convulsed surface of the infant planet.

### 500-225 million years ago

The Genesis account of creation is silent regarding the period 3,000-500 million years ago. During this era an explosion of life (such as invertebrate arthropods called trilobites) populated the seas, yet the inland areas remained barren.<sup>5</sup>

"God then commanded, "Let the waters below the sky be collected in one place, & let dry land appear;" & that was done ... God then said, "Let the Earth produce seed bearing herbage according to every species, as well as the different species of reproductive seed bearing trees" ... This was the close of the third age."<sup>6</sup>

The Genesis account begins again with a description of what science has named the Ordovician Period. During this period of time the predecessor of today's Atlantic ocean began to shrink as the primitive continents drifted closer together ... this process continued throughout the following 120 million years until the middle of the Permian Period (270 million years ago) ... the Earth's emerging land areas becoming welded into a single land mass that geologists call Pangaea.

During the period of continental drift toward the formation of Pangaea, itself sur-

rounded by one massive global sea, science records that in tropical & sub-tropical regions the flora underwent substantial development. Tropical forests rapidly colonised deltas whilst delta swamps formed upon debris brought down from the land by rivers ... species included giant tree-ferns, seed bearing ferns & horsetails." <sup>7</sup>

### The Zodiac Revelation

"And God said, "Let the luminaries be visible in the expanse of the sky ... that they may be for signs, & for seasons, & for days & for years " ... & that was done ... (so ends) the fourth age." <sup>8</sup>

Many have discarded the Genesis record of creation at this very point due to the apparent contradiction regarding the supposed creation of the sun, moon & stars during this Fourth Age. Having dealt with the creation of the universe within the first verse of the first chapter of the Bible it is reasonable to assume that the inspired writer is directing our attention toward a higher purpose assigned the constellations other than just brightening the night skies.

**That they may be for signs** ... refers to the fact that the ancients recognised that the 12 major constellations & the 36 minor constellations which comprise the zodiac do foretell, in their original incorrupted form, the prophetic plan & purpose of our God. <sup>9</sup>

It is not within the scope of this limited publication to cover this intriguing topic in greater detail. However the reader may obtain a comprehensive study concerning the witness of the stars upon request by simply contacting the address supplied at the rear of this booklet.

### 225 - 65 million years ago

The Mesozoic era opened with Pangaea splitting into a northern land mass called Laurasia & a southern land mass called Gondwanaland. Marine reptiles such as ichthyosaurs & plesiosaurs flourished. Primitive birds appeared whilst Dinosaurs ruled the land only to abruptly disappear at the end of this period, along with many other kinds of life. <sup>10</sup>

"And God said, "Let the waters be swarming with animal life, & let the skies be filled with flying things." And God prepared the great monsters, & the waters swarmed with every species of reptile ... This was the close of the fifth age." <sup>11</sup>

"... let the skies be filled with flying things. God prepared the great monsters, & the waters swarmed with every species of reptile." Genesis 1:20-23

### 100,000 - 4000 BC

"God then said, "Let the Earth produce animal life according to its species " ... God accordingly made the various species of animals of the Earth ... quadrupeds & wild animals. (Then) God created men ... (God said) "Let them have dominion over the fish of the sea, over the birds of the air, & over all the wild animals of the Earth " ... Then God blessed them saying, "Be fruitful & multiply; fill the Earth " ... (so ends) the sixth age." <sup>12</sup>

With most of the dominant reptile forms having vanished at the end of the Mesozoic, the Cenozoic era became the age of the mammal. <sup>13</sup>

The semi-nomadic Homo sapiens that suddenly appeared throughout the world during the Cro-Magnon era (40,000 BC) & the Neolithic era ( 10,000 - 8,000 BC ) super-

"God created men ... (God said) "let them have dominion over the fish of the sea, over the birds of the air, & over all the wild animals of the Earth." Genesis 1:24-31

seded & perhaps hastened the extinction of the preceding primitive Hominid creations.

Perhaps the best known of these extinct Hominid species is *Homo neanderthalensis* or the Neanderthal man, having existed from about 100,000 BC through to their demise around 40 -30,000 BC.

The new varieties of Hominid created within the Sixth Age were commanded to multiply & have dominion over the whole earth. Of one such group living in the California region of North America we read;

"An Archaic way of life, hunting deer & mountain sheep, fishing, netting migratory birds, harvesting pine nuts & wild grains developed by 8,000 BC & persisted with little change until about 1850 AD. Villages were simple with thatched houses ... but the technology of gathering, processing & storing food was very sophisticated." <sup>14</sup>

Religious myth makers, rejecting the Genesis account detailing a separate & ancient creation of primitive hunting & gathering races, continue to misrepresent the record of the inspired writer;

"... all the different tribal (racial) groups among men have developed from the originally created man & woman & are still basically one biological unit <sup>15</sup>" "The Biblical account tells us that we are all descended from Adam & Eve." <sup>16</sup>

Such Religionists are not alone in their search for the elusive common ancestor of all mankind. For we see that the disciples of Secular Humanism, also advocate such a view, yet for a political purpose;

"Soviet anthropology develops the one true concept that all races of mankind are biologically equal. The genuinely materialist conception of the origin of man & of races serves the struggle for democratic socialism (communism)." <sup>17</sup>

In contradiction to the ever changing views of the religionist & the humanist regarding the origin of race & man the geo-fossil records provide evidence of sharp, neat steps in the appearance & extinction of many biologically & culturally different human types or species, <sup>18</sup> each uniquely designed & equipped by the Creator to fulfil a specific role in the unfolding drama of world history.

Who then was the mysterious Adam & from where did he come? ... The answer to this question we shall explore in the following chapter.
